- SpO2 & Heartbeat measurement
- OLED Display
- USB rechargeable
- 48 Hours of power backup
- High quality Electronics and Photonics Components.

who we are

AG Technologies, incubated at CITTIC, CUSAT, by an academician and a group of technical experts have developed a very precise and indigenous Pulse Oximeter with high quality electronics and photonics components having state of the art OLED display and USB recharging capability.

Estimation of the amount of oxygen in your blood is performed using SpO2 measurement which indicates what percentage of your blood is oxygen saturated. Hence during the current ongoing Covid 19 pandemic situation, this measurement forms a vital sign worth monitoring.
